Problem we are tackling

Students struggle on how to manage and set study time. Being familiar with common managing time practices can help many students.

Students: Do you struggle with managing your time?

Importance

- Students have to complete a substantial amount of work and assignments in their academic quarter or semester. Proper time management is important for satisfactory academic performance.

Our way to solve the problem

Create a mobile app that will:

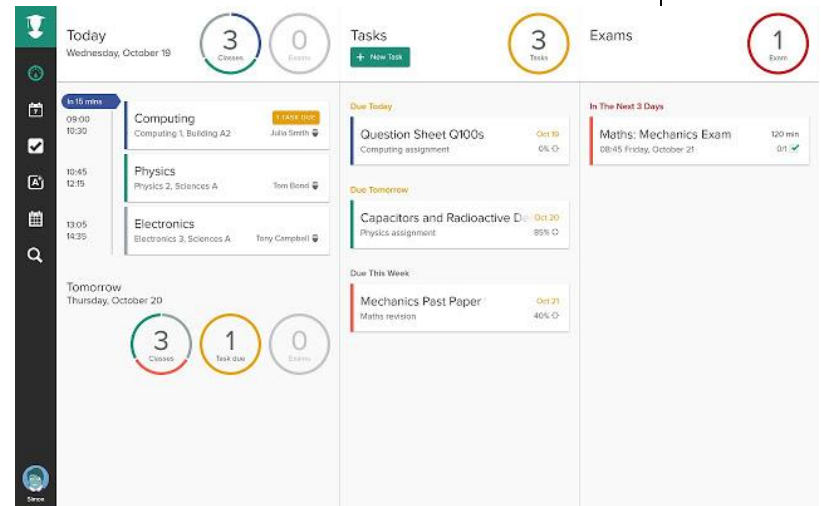

- Help students set an initial study schedule.
- Prompt students to begin study tracking based on set study schedule or they can manually initiate study tracking.
- Track the study by location, to find best personalized study places.
- Update family members or friends with texts on your study progress .
- Motivate students with notifications.
- Study schedules can be optimized based on collected study data (Possible feature).

Machine Learning(Possible feature)

- Data Set
 - former students learning information(grades, locations, schedules)
 - previous work
- Model Initialisation:
 - final grade prediction
 - weekly learning hours recommendation
 - schedule recommendation (seq2seq NN)
- Model update
 - every time new user grade(quiz/final) comes

Evaluation

- Survey
- Alpha version test
- Beta version test
- Feedback collection

Difficulty points

- Every 5 android screens (4)
- Location sensing (4)
- SMS: Send/receive SMS (4)
- MPAndroid Charts (4)
- Activity Recognition (6)
- GeoFencing (6)
- Speech Recognition (6)

That will be adjusted as we start working on the project to match the 20 maximum points.
