Steps to import Android studio sample codes:
1- Select File → New → Import Sample.
2- Use the search box or the scroll bar to browse the samples.
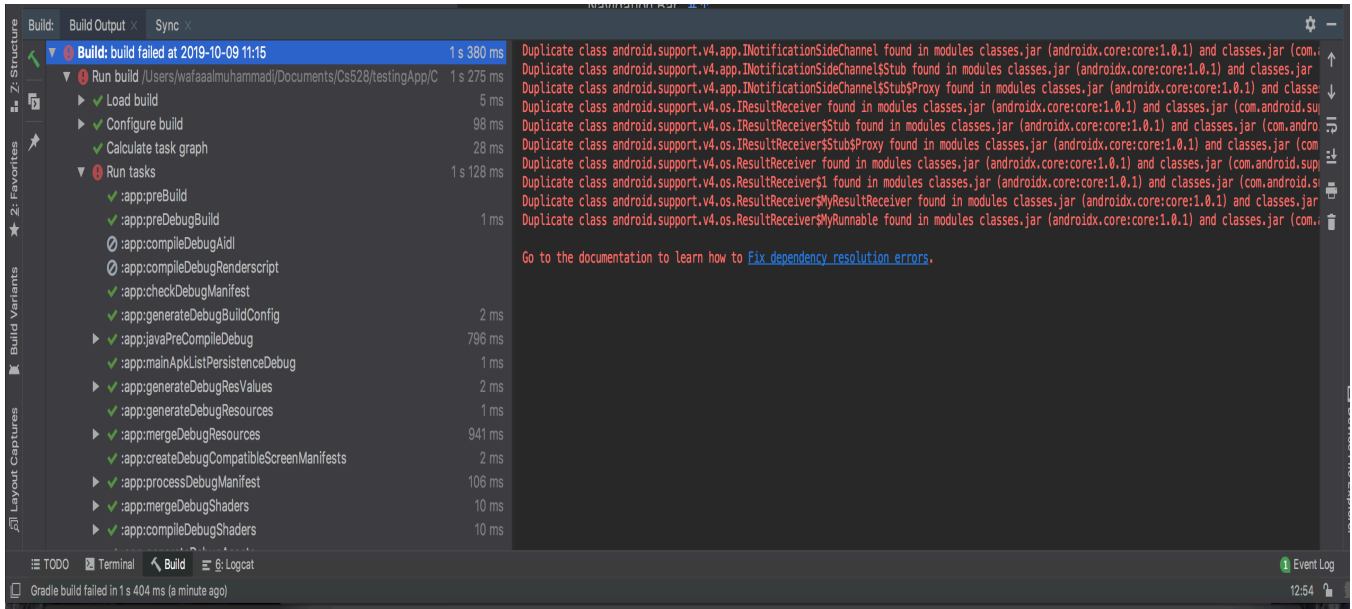

o   To import Activity Recognition sample:

o   For Step Counters and Step detectors, you can find Batch step sensors sample under Sensors category.
o   For Geofencing, under Location category, find Creating and Monitoring Geofences sample.
o   For playing sound, find Native Audio sample under NDK

- You may have the following issues when you import the Creating and Monitoring Geofences and Recognizing the user's current Activity samples,

Program type already present: android.support.v4.app.INotificationSideChannel. → or

to fix these issues, go to gradle.properties and add these two lines:

```
android.useAndroidX=true
android.enableJetifier=true
```
