

Asset List & Content Creation Project 3

Due date: Monday, September 17th At 10:00am

Introduction

Third in a series of related projects
 Will build towards working game

Focuses on

- the content that must be created for a game
- decisions and tradeoffs that go into its creation
- For the artistic creation part, don't worry if not an artist
 - graded more on your ideas and effort than on your execution

Motivation (1 of 2)

- Creativity in game art necessary, but must be constrained if production deadlines of game are to be met
 Need sound planning and decision-making to produce art in timely fashion
- Only finite resources (time and money)
 So tradeoffs between quality (spending lots of time on all art) and quantity (using simple art or re-using art for many assets)

Motivation (2 of 2)

- Planning is important in content creation as in other parts of game development
 - Changing character design at concept costs a few hours of time at the drawing board
 - Changing character design that has been animated costs weeks
 - Exacerbated if technical (ex: MIDI to something else, normal to bump-mapped) since affects programming
- The purpose of this assignment to familiarize with decision making and trade-offs

Overview

- □ Work in same group
- Identify, select and create array of content for game and briefly document
- 1) Short vision statement (100 to 250 words)
 "soft plan" for your game's content
- 2) Identify assets: sprites, tiles, sound effects, music, icons, etc.
 - "hard plan" for your game's content
 - Use a spreadsheet for this!
- 3) Select content from 3rd party source
- 4) Generate a small amount of original artwork

Vision Statement

- Describe "look and feel" of your game's content 100-250 words
 - No specific format, just effective and Describe motifs, styles, colors, sounds
- Sketches of characters or settings optional
- Can reference movies, games, etc. as inspirational
 - Say explicitly which aspects, not just whole film
 - Can include specific descriptions or sketches of specific characters, environments, interfaces, etc.
- Clear enough so if given to several artists, they would all return with similar work

Identify Assets

Identify all assets for game

sprites, tiles, sound effects, music, icons ...

Document functional requirements

- sprite size (dimensions), number of frames and types for animations, length of sound loops ...
- Ok if details are just best-guesses
- Ok to specify ranges

Must use a spreadsheet for this

- Rows: assets
- Columns: Attributes

Will also map item to file name of acquired asset (next task)

Select Content

- □ Select content
 - Pointers to libraries on Web page, but can use others
 - Document sources
- Briefly describe (100-250 words) how fits vision
 - Explain why chose assets that you did
 - Describe tradeoffs and compromises
 - Address "soft" and "hard" requirements, as appropriate

Create Content

- □ 40 "assets" (to be used in GameMaker)
 - One image, tile, icon, frame-of-animation, soundeffect, or measure-of-music is one "asset"
 - Any combination
 - Could be single sprite
 - Hint: one sprite faces in four directions with five frames of animation per direction = 20 frames)
- Artistic quality less important than fact that art is:
 - Original
 - Fits with vision

Grading Guidelines

Deliverable	Weight
Artistic Vision Document	10%
Content Requirements	25%
Content Selection Listing	25%
Content Selection Justification	10%
Original Content	25%
Misc	5%

Submission

Turnin (see Web page for instructions)

Document

- Can be one, or separate for each
- Original content

Resources

□Links to libraries of tilesets, sprites, sounds

- If you find others, can let class know!
 Use forums
- Not all of the resources are free in the same way
 - Respect the authors' rights by following the rules set forth
