Texturing

- Created/manipulated using image-processing software
  - Photoshop
  - Paint Shop Pro
- Mapped to geometry (models)
- Very powerful image enhancing techniques
  - Can be used for fake shadows, fake reflections, much more
Mapping to Models

- Objects are made from
  - Geometry (a.k.a., polygons)
  - Lighting
  - Textures

- Vertices and connectivity
  - Triangles
  - Triangle-strips
  - Meshes
  - Patches/surfaces

- More on this next time!

Textures

- Images that are applied to geometry

- Many ways to apply textures
  - Decal
  - Blend
  - Layer

- Can use for other things as well
  - Height fields
  - Environment mapping
  - Bump mapping
  - Displacement mapping
Scenes

Texture Mapping Example
Texture Mapping Example

Bump Map Example: Texture
Bump Map Example: Bump Map

Example of Blending
Skybox Rendering

- Create **really big** a cube around the world
- Texture each side with a sky texture
- Example: Torque
Sources of Textures

- Computer-generated
  - Complete control, might not be realistic
  - Generate a repeating pattern
  - Generate a random pattern (like noise)
  - Simulate physical properties

- Digital camera
  - Realistic, but hard to control
  - Can stitch into mosaic

- Hybrid
  - Start with a photo, edit as necessary

Resources

- Nice place for textures (pay)
