Summaries for Possible Final Project Games

Team members (Full Name, Email Address):

1. **Game Name:** Hooping
    Game Genre: 3-D Racing
    Brief Description:
    This is a racing game for space ships. Each participant must maneuver a space ship through a series of check-point hoops laid out along a course. Because this takes place in space, successfully navigating the course will require maneuvering in three dimensions. Think of this as pod racing in 3D.

    Significant Technical Features:
    1. First-Person View
    2. Movement in 3-D
    3. Damage changes ship characteristics (handling, speed)
    4. Various obstacles on each hoop segment

    Artistic Features:
    1. Simple ships
    2. Each hoop has a different visual look
    3. Each obstacle is mechanical
