1. **Credits:** 3
   a. Class Meets: **Tuesday and Thursday 4:00pm - 5:20pm, Salisbury Labs 305**

2. **Instructor:** Kyumin Lee, (435) 797-8420, kmlee@wpi.edu
   Office Hours: **Tuesday and Thursday 3:00-4:00pm** at FL 130

   **TA:**
   Office Hours:

3. **Primary Textbook:**

4. **Additional Readings will be drawn from the following textbooks:**
   a. Learning From Data by Y. S. Abu-Mostafa, M. Magdon-Ismail, and H.T. Lin., AML Book
   c. Machine Learning Lecture Notes by Andrew Ng

5. **Specific Course Information:**
   a. Course Description: Machine learning deals with the design and study of computer programs that are able to improve their own performance with experience, or in other words, computer programs that learn. In this course, we investigate different machine learning paradigms including supervised, unsupervised, and reinforcement learning. We study multiple classification, regression, clustering, meta-learning and reinforcement learning techniques. Students gain extensive understanding of and experience with theoretical and practical aspects of machine learning. Students will conduct a team-based project.
   b. Prerequisites: I expect all students to have had some previous exposure to basic probability, statistics, algorithms, and data structures. You should be able to design and develop large programs and learn new software libraries on your own.

**Communication:**
All course announcements will be posted via the Canvas course mailing list.

**Grading Policy:**
The course grading policy is as follows:
5% Attendance and in-class discussion
24% Assignments
20% Midterm
20% Final
31% Project

The grading scale for graduate students is A:100-90, B:89.9-80, C:79.9-70, D:69.9-60, F:59.9-0
The grading scale for undergraduate students is A:100-90, B:89.9-80, C:79.9-70, NR:69.9-60, I:59.9-0

Assignments:
There are four assignments. Each assignment is proportion to 6% of your grade. You will have total 4 late days during the semester. You can use up to 2 late days for each assignment without penalty. After you consume the total 4 late days or two late days for an assignment (whichever comes first), then you will get penalty proportion to extra late days (e.g., 10% off for the next late day, 20% for the next two late days and so on).

For example, you submitted your first assignment 2 days late. You will not get any penalty, but use 2 out of 4 late days. Or if you submit your first assignment 3 days later than due date, you will use 2 late days (again up to 2 late days for an assignment), and get 10% off penalty because of the third late day.
For each assignment, we will NOT accept your solution more than 3 days late.

You may discuss an assignment with your colleague, but you should write a program and a report by yourself and should NOT copy and paste your colleague's solution. If you discussed an assignment with your colleague, explicitly report the colleague's name and what you discussed in your submission.

Exam:
The midterm and final exams are closed book and will be held in class.

Project:
In the final project, you will apply algorithms, methods and techniques that you learned from this course to your project. The detailed information regarding the final project will be announced in class. You will present and may demonstrate your project in the end of the semester.

Add policy:
A student can add/drop through the 10th day of the semester without a fee. After day 10 of the semester, students can add courses (with instructor approval) with a $100 late fee. Students must be officially registered for this course. No assignments or tests of any kind will be graded for students whose names do not appear on the class list. Refer to https://www.wpi.edu/offices/registrar/course-registration/add-drop
Drop policy:
No drops are allowed after the 10th day of the semester.

Learning Aids:
Lecture notes and schedule will be available in the course web page. Your homework solution and project report is supposed to be submitted via Canvas.

Plagiarism and Cheating:
Unless explicitly noted, all work you submit must be your own work. You are encouraged to discuss with others about ideas and material in the course, in preparing for exams, in understanding homework problems, project statements, etc. However, all homework solutions, exams are to be written individually, and the solutions should be your own, unless otherwise specified. Projects encourage teamwork, that is, in that case you are expected to work closely with your partner/(s) to solve problems and prepare a common agreed-upon solution.

Note in particular that copying of any material, may it be a single sentence or a figure, from any location (including the internet) without proper acknowledgement of the source constitutes plagiarism. If in doubt, please ask for clarification. Any violation of the WPI's guidelines for academic integrity will result in no credit for the course and referral to the Student Affairs Office for disciplinary action. You should be familiar with the WPI Policy on Academic Honesty.

Students with Disabilities:
If you need course adaptations or accommodations because of a disability, or if you have medical information to share with me, please make an appointment with me as soon as possible. If you have not already done so, students with disabilities who believe that they may need accommodations in this class are encouraged to contact the Office of Disability Services (ODS) as soon as possible to ensure that such accommodations are implemented in a timely fashion. This office in Daniels Hall has phone (508-831-4908) and can be reached by email at disabilityservices@wpi.edu.
