CS 577 / EE 537
Advanced Computer Networks
Fall 2007
Professor Bob Kinicki
Course Objectives
Course Objectives

- To grasp the *current directions* of computer networks research.
- To provide in-depth coverage of three research areas *{a limited breath goal}*.
- To fill gaps in students’ networking knowledge.
- To prepare students to conduct research.
Course Objectives

- To refine research skills:
  - To develop literature searching and literature review techniques.
  - To analyze and evaluate published results.
  - To improve oral and written communications skills.
  - To better understand experimental methodology.
  - To appreciate performance evaluation issues.
