CS 577 / EE 537
Advanced Computer Networks

Fall 2011
Professor Bob Kinicki
Course Objectives
Course Objectives

- To grasp the **current directions** of computer networks research.
- To provide in-depth coverage of three or four research areas {a **limited breath goal**}.
- To fill gaps in students' networking knowledge.
- To prepare students to conduct research.
Course Objectives

To refine research skills:

- To develop literature searching and literature review techniques.
- To analyze and evaluate published results.
- To improve oral and written communications skills.
- To better understand experimental methodology.
- To appreciate performance evaluation issues.
