Course Objectives
Course Objectives

- To introduce the current directions of computer networks research.
- To provide in-depth coverage of three or four research areas (a limited breath goal).
- To fill gaps in students' networking knowledge.
- To prepare students to conduct research.
Course Objectives

- To refine research skills:
  - To develop literature searching and literature review techniques.
  - To analyze and evaluate published results.
  - To improve oral and written communications skills.
  - To better understand experimental methodology.
  - To appreciate network performance evaluation issues.
