CS577/EE537
Advanced Computer Networks

Summer 2003
Professor Bob Kinicki
Course Objectives

• To grasp the current direction of computer networks research.
• To provide in-depth coverage of three research areas {a limited breath goal}.
• To fill in gaps in students’ networking knowledge.
• To prepare students to conduct research.
Course Objectives

• To refine research skills:
  – To develop literature searching and literature review techniques.
  – To analyze and evaluate published results.
  – To improve oral and written communications skills.
  – To better understand experimental methodology.
  – To appreciate performance evaluation issues.
