CS4516 C10
Advanced Computer Networks
Professor Bob Kinicki
rek@cs.wpi.edu
Course Objectives

1. To fill holes in computer networks concepts not covered in CS3516 B09.
2. To provide more in-depth treatment of some networking concepts.
3. To develop an understanding of modern network architectures from a design and performance perspective.
4. To clarify networking terminology.
Course Objectives

5. To provide an opportunity to do network programming using TCP/IP.

6. To give the students experience working in programming teams.

7. To provide a wireless sensor programming experience using TelosB motes.

8. To expose students to emerging technologies and their potential impact.
