Course Information

Professor Bob Kinicki, rek@cs.wpi.edu, FL135, phone: 831-6116

Teaching Assistants: Ken French kfrench@wpi.edu

Huahui Wu flashine@cs.wpi.edu

Student Assistant: Joe Chiarella stype@wpi.edu

Office Hours: REK: TBA

TAs: TBA

This course introduces students to the basic principles of computer networks. Although current technologies will be discussed, the emphasis is on understanding the important issues in modern computer networks that affect design and implementation. The programming assignments require a good background in programming in C or C++ and will involve UNIX system calls.

Students are responsible for **any** information given out in class and should read email daily.

Text: [required] Communication Networks, Fundamental Concepts and Key

Architectures, Alberto Leon-Garcia and Indra Widjaja

[recommended] UNIX Network Programming, Second Edition, W. Richard Stevens

Academic Honesty: Cheating or plagiarism will not be tolerated and will result in an NR grade for the course. Discussing assignments and approaches to solving them is permitted, but the expectation is that programs turned in are the work of that programming team. It is fine to find algorithms or code from publicly available sources such as a textbook or a public Web site. However you **must** document the source clearly in your code and in your program documentation. Failure to do this will be treated as plagiarism.

Class Email: You have automatically been added to the class email list: cs4514@cs.wpi.edu. The TAs and I will use this mailing list to send information to the class. You can send email to the entire class using this group alias. However, judicious and courteous use of this class alias is expected. Inquiries concerning the course should be sent to cs4514_ta.wpi.edu. The TAs will monitor this list and answer detailed questions. I will handle all policy issues.

Programming Assignments

http://www.cs.wpi.edu/Help/documentation-standard.html specifies the CS Department Documentation standards. Documentation rules will be discussed in class prior to the first due date. Every function or subroutine **must** include the author of the function. This is critical to grading team projects.

You must use *turnin* to turn in all the programming assignments for this course (see http://www.cs.wpi.edu/Help/turnin.html). Please include a README file with each assignment to provide information to assist the TAs in grading your programs.

All programs turned in must compile and execute on one of the WPI UNIX platforms. You are encouraged to develop your programs on WPI UNIX machines because historically students have had difficulties porting their programs from other operating systems and because there will be test files available on CCC machines. Turned-in programs that do **not** successfully compile will not be graded and will receive a grade of **0**. Programs **without** comments will also not be graded and receive a grade of **0**.

Late Assignment Credit

Programs that are late time **t** where:

0 minutes < **t** < = 1 day lose 10% off the top of the maximum point count before the rest of the grading begins

1 day <t <= 3 days lose 30% off the top of the maximum point count before the rest of the grading begins

3 days <t the maximum grade attainable is only 50% of the original points

Weekend days (Saturday and Sunday) are excluded from the count of late days. NOTE: Programs are due at the **beginning of class on the due date specified.** Hence, the late time, **t**, given above is measured from **9** a.m. on the due date.

No programs will be accepted for grading after 4 p.m., December 17, 2001.

Grading Points

To pass this course you must have a passing grade on the programming assignments **AND** on the exams.

Assignment 1	30	Pts	Mid Term Exam	70 pts
Assignment 2	50	Pts	Final Exam	100 pts
Assignment 3	60	Pts		
Programming Total	140	Pts	Exam Total	170 pts
*Subjective Points	20	Pts		

Total Points 330 Pts

* **Subjective points** come from opinions of the instructor and the TAs with respect to class participation, any homework assignments, and effort seen through interaction with the TAs on programming assignments. Please be sure to introduce yourself during office hours if you want to receive subjective points.
