Course Information

Professor Bob Kinicki  rek@cs.wpi.edu,  FL135 , phone: 831-6116

Teaching Assistants: Li Xu  lxu@cs.wpi.edu
                       Zici Zheng  zici@cs.wpi.edu

Office Hours: rek: Tues 9-10, Fri 3-4
              TAs: held in FLA21. Times to be announced.

This course introduces students to the basic principles of computer networks. Although current technologies will be discussed, the emphasis is on understanding the important issues in modern computer networks that affect design and implementation. The programming assignments require a good background in programming in C or C++ and will involve UNIX system calls.

Students are responsible for any information given out in class and should read email regularly.

Text: [required]  Communication Networks, Fundamental Concepts and Key Architectures, Alberto Leon-Garcia and Indra Widjaja

Academic Honesty: Cheating or plagiarism will not be tolerated and will result in an NR grade for the course. Discussing assignments and approaches to solving them is permitted, but the expectation is that programs turned in are the work of that programming team. It is fine to find algorithms or code from publicly available sources such as a textbook or a public Web site. However you must document the source clearly in your code and in your program documentation. Failure to do this will be treated as plagiarism.

Class Email: You have automatically been added to the class email list: cs4514@cs.wpi.edu. The TAs and I will use this mailing list to send information to the class. You can send email to the entire class using this group alias. However judicious and courteous use of this class alias is expected. Inquiries concerning the course should be sent to cs4514_ta@cs The TAs will monitor this list and answer detailed questions. I will handle all policy issues.

Programming Assignments

http://www.cs.wpi.edu/Help/documentation-standard.html specifies the CS Department Documentation standards. Documentation rules will be discussed in class prior to the first due date. Every function or subroutine must include the author of the function. This is critical to grading team projects.

You must use turnin to turn in all the programming assignments for this course (see http://www.cs.wpi.edu/Help/turnin.html). Please include a README file with each assignment to provide information to assist the TAs in grading your programs.
All programs turned in must compile and execute on one of the WPI Unix platforms. You are encouraged to
develop your programs on WPI Unix machines because historically students have had difficulties porting their
programs from other operating systems and because there will be test files available on CCC machines.
Turned-in programs that do not successfully compile will not be graded and will receive a grade of 0. Programs without comments will also not be graded and receive a grade of 0.

Late Assignment Credit

Programs that are late time $t$ where:

$0 \text{ minutes} < t \leq 1 \text{ day}$ lose 10% off the top of the maximum point count before the rest of the grading begins

$1 \text{ day } < t \leq 3 \text{ days}$ lose 30% off the top of the maximum point count before the rest of the grading begins

$t > 3 \text{ days}$ the maximum grade attainable is only 50% of the original points

Weekend days (Saturday and Sunday) are excluded from the count of late days. NOTE: Programs are due at the beginning of class on the due date specified. Hence, the late time, $t$, given above is measured from 2 p.m. on the due date.

No programs will be accepted for grading after 4 p.m. Tuesday, February 27, 2001.

Grading Points

To pass this course you must have a passing grade on the programming assignments AND on the exams.

| Assignment 1 | 30 Pts | Mid Term Exam | 70 pts |
| Assignment 2 | 50 Pts | Final Exam | 100 pts |
| Assignment 3 | 60 Pts |

Programming Total 140 Pts Exam Total 170 pts

*Subjective Points 20 Pts

Total Pts 330 Pts
* The **subjective points** come from opinions of the instructor and the TA with respect to class participation, any homework assignments, and effort seen through interaction with TA on programming assignments.
