

Andreea Bodnari
Founder and CEO
DocDecode

Andreea Bodnari is the founder and CEO of DocDecode - an enterprise SaaS company automating reading for the financial industry. Her foray into Artificial Intelligence started in the medical space, as she researched machine learning solutions for cancer treatment outcomes and proteomics profiling at UMass Medical School, Worcester. Dr. Bodnari has earned a BS in Computer Science from WPI and a PhD from the MIT CSAIL laboratory focused on Artificial Intelligence applied to natural language processing. Her work has appeared in numerous publications including JAMIA, NIPS, KDD and was acknowledged internationally by CNRS and nationally by the CRA.
