

Roger Heinen
Director
Monotype

Roger Heinen has over 45 years of computer industry experience. After receiving his BSCS at WPI in 1973 he joined Digital Equipment where, as an individual contributor, he rose to become the Corporate Consulting Engineer for Software. In the late 80's he was hired by Apple Computer as Senior Vice President to lead all of Apple's software development organizations. In January, 1993 Microsoft named him Senior Vice President, Developer Division responsible for developer tools and database technology. In 1996 he moved to Islesboro, Maine and embarked on a career as a lonesome cowboy angel investor focused on mentoring and financing early-stage startups. He has been a board member for countless public, private and non-profit organizations. Recently he led an effort to finance, construct and operate the Islesboro Municipal Broadband. The IMB is a town-owned, low-cost 1-gigabit fiber-to-the-premise Internet access service for every home and business in the offshore island community. He is currently a director at Monotype (NASDAQ: TYPE) the world leader in the design of typefaces. If you have used a mobile phone, tablet, PC or printed a document you have used Monotype's typefaces. Roger holds degrees from WPI and the Stanford Graduate School of Business
