

Jr. Mobile App Developer (iOS)

Let's Pick! (Offsite)

Let's Pick! is the first mobile app of its kind that allows users to create their own fantasy contest or draft about **anything**. Our platform gives unprecedented power to the people by letting them call the shots. Everyone – not just sports fans – has the opportunity to create, compete, and WIN on Let's Pick!

Let's Pick! is looking to bring a junior mobile app developer on to our team, with the possibility of transitioning into our Chief Technology Officer by 2019. The developer will build upon the current version of our app, which has been featured on the App Store since November 2017.

We are offering you - yes, YOU - the opportunity to join the ground floor of a startup that has two years of experience and an existing app. This is a chance to improve your portfolio, apply your skills to an innovative project, and earn equity in a growing company.

Minimum Qualifications:

- Excellent communications skills
- Prior experience working on development for at least **one** iOS mobile app
- Comprehensive understanding of Swift, Node.js, and Ruby, including ability to take previously written code and build upon it.

CANDIDATES: Please write to admin@letspickapp.com and tell us how you are qualified, and why you want to join the team. Attach your résumé to the email.

We look forward to hearing from you!
