

Research Paper Evaluation Form

Paper Title: _____

Student: _____

Date Submitted: _____ **Points** _____

1. Summary. Present in your words a summary of the information presented in this paper. Be careful **not** to simply mimic the abstract. Include reasonable detail concerning any new concepts, algorithms, and tools proposed. **Summary length should be between 100 and 300 words.**

2. Research Contribution. Based on your knowledge of this research area (which may be limited), does this paper provide a significant research contribution either in terms of new research or as a thorough survey. If your answer is **Yes**, discuss in detail the **one** most significant result (in your opinion) that would cause future researchers to reference this paper. If your answer is **No**, explain and critique why this paper makes little or no contribution to this research area.

3. Supporting Evidence. How well did the authors support their research in terms of showing how their new ideas performed compared to previous strategies? Evaluate their previous research section. Explain how the evidence provided supports their claims. Point out weaknesses to their claims and suggest circumstances and scenarios when the proposed ideas might yield poorer results than reported in the paper.

4. Referee's comments. Put yourself in the position of a referee reviewing this paper for publication. Suggest changes the authors should make in the writing or physical presentation to improve the quality of this paper.
